Wireless Ronin<sup>®</sup> Technologies Partners with Brookview Technologies to Offer an  
All-in-One Digital Signage Solution

MINNEAPOLIS - February 6, 2007 - Minneapolis based digital signage company, Wireless Ronin<sup>®</sup> Technologies, Inc. (NASDAQ: RNIN), has entered into an agreement with Brookview Technologies to resell the RoninCast<sup>®</sup> digital signage software.

"Our RoninCast software is a great complement for the Brookview line of products," said Jeffrey Mack, President and CEO of Wireless Ronin Technologies. "By combining our software with their display products they have created an all-in-one offering for their clients to manage their digital signage more effectively."

Through this agreement Wireless Ronin expects to expand sales efforts by integrating the RoninCast digital signage software with Brookview's cutting-edge transparent projection display technology to create a dynamic product offering. Wireless Ronin expects Brookview's focus on retail, financial and corporate businesses to assist Wireless Ronin in further penetrating those markets.

In the past Brookview's clients have updated their displays using DVDs and other forms of traditional content transmission. With the RoninCast digital signage system, Brookview's clients can now update, manage and monitor their displays in real-time from one central location.

"The RoninCast software effectively meets the desires our customers have expressed to be able to efficiently manage and update the messaging in real-time," said Jim Fuller, President of Brookview Technologies. "We are very pleased to be able to add this software to our product line."

Brookview Technologies provides projection displays using transparent screens that can perform in high ambient light environments, maintain a wide viewing angle and can be used as interactive touch screens. As the distributor in the U.S. and Canada of the HoloPro™, and ViP Interactive brands, Brookview Technologies holds a competitive stance in the rear projection marketplace.

Under this agreement, Brookview will manage installation and project management. Wireless Ronin will provide training, support and maintenance related to the RoninCast digital signage software.

#### About Wireless Ronin Technologies

Wireless Ronin Technologies ([www.wirelessronin.com](http://www.wirelessronin.com)) is the developer of RoninCast, a complete software solution designed to address the evolving digital signage marketplace. RoninCast provides clients with the ability to manage a digital signage network from one-central location. The software suite allows for

customized distribution with network management, playlist creation and scheduling, and database integration. An array of services are offered by Wireless Ronin to support RoninCast including consulting, creative development, project management, installation, and training. The company's common stock is traded on the NASDAQ Capital Market under the symbol "RNIN".

*This release contains certain forward-looking statements of expected future developments, as defined in the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this release refer to opportunities associated with the reseller agreement. These forward-looking statements reflect management's expectations and are based on currently available data; however, actual results are subject to future risks and uncertainties, which could materially affect actual performance. Risks and uncertainties that could affect such performance include, but are not limited to, the following: our estimates of future expenses, revenue and profitability; trends affecting our financial condition and results of operations; our ability to obtain customer orders; the availability and terms of additional capital; our ability to develop new products; our dependence on key suppliers, manufacturers and strategic partners; industry trends and the competitive environment; and the impact of losing one or more senior executives or failing to attract additional key personnel. For more detailed information about these risks and uncertainties, please review the Company's current report filed on Form 8-K with the Securities and Exchange Commission on January 26th, 2007.*
